Abstract

A sweet abstract

---

[*]Corresponding author: author@gmail.com

Introduction

Some intro and here is a reference test Relton & Davey Smith (2010)

Methods

an-example-subheading

Here is an equation for you nerds out there:

$$f(k) = \binom{n}{k} p^k (1-p)^{n-k} \tag{1}$$

Well would you look at that sweet equation. Let's give it a reference: if you love a binomial distribution look at equation (1)

Code availability

Code used to run the analyses is available here: https://github.com/thomasbattram/something

All analyses were completed using R (version **X**).

Results

study data example

Table 1: A table caption

study	n	n_with_data
study1	12300	11300
study2	40000	39000
study3	5000	4000

Table 1

another subheading

Well wouldn't you look below it's **Figure 1**

Figure 1: This is an example text reference for a figure caption.

And look at this, one more figure!!! See **Figure 2**

Figure 2: This is an example text reference for a figure caption.

Let's link to my github page because I can Tom's github.

Haven't figured out how to link to **Supplementary figures** yet.

Discussion

A discussion subheading

Limitations

Conclusion

Overall this paper is the best and should be accepted in Nature, Science, NEJM and JAMA all at the same time.
